BAKERY FEEDS PHASES I & II

NORTH BALTIMORE, OH

REAL ESTATE | **DEVELOPMENT** | **CONSTRUCTION** | PROPERTY MANAGEMENT

EXXCEL was hired by Bakery Feeds to provide site development, design-build, and construction services to build a new facility. This new facility would be used to recycle inedible bakery waste to produce high energy feed ingredients for livestock. The incorporation of ***EXXCEL***'s value engineering ideas, unique procurement process, and speed of construction allowed the project to be delivered on time and under budget.

The facility features 932 linear feet of dual rail service to and through the building, five grade-level overhead doors, four drive-through doors, concrete push walls, a two-story office, 75 trailer parking spaces, a security fence, and 30' clear height at the eaves. it also features a Butler pre-engineered metal structure.
